LATEST EXPERIENCE

Software Engineer & Product Owner

MundiMoto Group 2021 - Present

I work at MundiMoto as a Software Engineer and Product Owner. I'm part of a team tasked to maintain and develop products both internal and external. My responsibilities include:

- **Development of new features** in order to improve the motorcycle purchase process.

- **Design new features and products** to be used internally by the employees of MundiMoto.

Software Engineer

Accedo 2021 - 2022

I worked at Accedo as a Software Engineer in a team tasked to port and develop new features for a streaming app. My responsibilities include:

- **Development of new features** for a popular VOD and streaming app from the UK.

- **Porting** the same app to new devices like smart TVs, consoles or set-top boxes.

Software Engineer & Project Manager

g-stocks Global Investments. 2018 - 2021

I worked for g-stocks as a Software Developer & Project Manager. My responsibilities included:

- **Development of a new web app** about stocks trading targeting desktop & mobile devices built using ReactJS & Scss.

- **Management of a project and a team** of 3 people to develop an IOS app for the iPhone using Swift.

- **Develpment of a desktop application** about stocks trading using JS, D3.js, CSS3 & HTML5.
